Ps

## COURSE
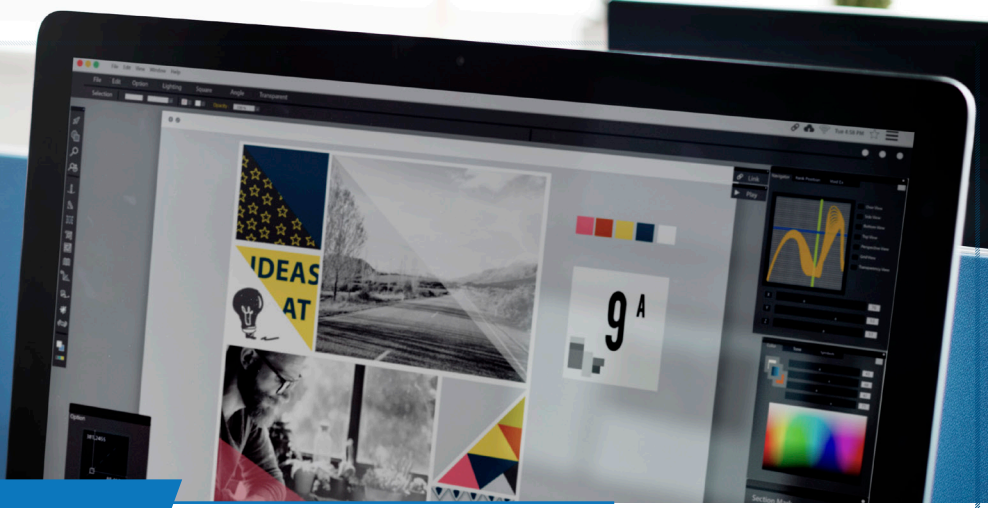

## For whom is the course for?

**This course is suitable for**
- Beginners who wants to become a graphic designer.
- Students who have the passion of designing.
- Professionals who wants to increase the designing skills.

## Pre-requisites

**Basic understanding of computer is enough to learn this course.**

# About **PHOTOSHOP**

PHOTOSHOP is a versatile graphics editing software with a user-friendly interface, support-ing various file formats. It offers advanced tools for 3D modeling and video editing and allows for precise editing with masking, selection tools, and effects.

It is essential for designers, photographers,and artists to manipulate digital images and graphics.

## What you can expect ⁇

**Understand the Photoshop interface:** navigate the Photoshop user interface, understand the menus and tools, and customize the workspace to your preferences.

**Understand the basics of image manipulation:** change the size, color, saturation, brightness, contrast, and sharpness of an image, as well as other basic manipulation

**Using Layers and Masks:** Use layers and masks to work on specific parts of an image and to create complex effects.

**Creating special effects:** create special effects such as filters, text effects, drop shadows, highlights and more.

**Understanding file formats:** different file formats for saving and exporting images for specific uses such as print, web and social media.

## Where to look for JOB ⁇

**Advertising Agencies:** Advertising agencies employ graphic designers to create ad campaigns for clients.

**Web design companies:** Web design companies hire designers to create user interface designs, mockups, and banner ads.

**Video production companies:** Video production companies employ motion design artists and video editors to create animations and videos.

**Graphic design studios:** Graphic design studios hire graphic designers to create logos, illustrations, and product designs.
